Pooling Railway

Passenger Service

Montreal, Que., March 20.—The Canadian National and Canadian Pacific Railways have agreed, in principle, to pooling of competitive passenger services wherever possible. Detailed arrangements for making the pool effective East and West, will take some time to complete, but in order to effect immediate economies, the two companies have arranged for a partial pooling of passenger services between Montreal-Toronto and the pooling of all passenger service Ottawa-Toronto, these consolidations to be effective on Sunday, April 2nd. An economy of well over half-a-million dollars a year will result from these initial developments in the pooling arrangements.

The pooling arrangement is an extension of the continued reduction in passenger service to meet the decline in passenger traffic. It is felt that the

NOTICE

NOTICE is hereby given in accordance with the provisions of the Water Resources Act, the undersigned has filed the necessary application and plans required by Section 11 of the said Act, in the Water Resources Office, at Edmonton.

The application apply for the right to divert water from Lethbridge coule on the N.W. 1/4 of sec. 7, tp. 22, rgr. 5, west of the fourth meridian, for irrigation purposes, and for the right to construct the necessary works, as defined by the application, which will enable the diverted water so diverted to be used for the said irrigation purposes on the N.W. 1/4 and S. 1/4 of sec. 7, tp. 22, range 5, west of the fourth meridian.

Dated at Edmonton, Alberta, this 20th day of March, 1933.

Shower for Mrs. C. Leach

A miscellaneous shower was held in the Sunday School room of the United Church on Tuesday evening, in honor of Mrs. Clinton Leach. A large number of friends were present and the bride was the recipient of many useful and lovely gifts. The evening was spent in contests and games, and a very nice lunch was served by the C.G.I.T. girls. The "Express" joins with their many friends in wishing the young couple a long and happy married life.

Those Who Roll Their Own Will Pay Tax

Ottawa, March 22.—The cigarette smoker who rolls his own will contribute to the treasury under the budget provisions to the extent of two cents for each package of 100 papers or less, and at the rate of 10 cents per 100 for cigarette "fillers."

This tax will not apply on papers and fillers used by cigarette manufacturers.

All Cheques To Have Three Cent Stamp Affixed

Ottawa, March 22.—No longer will bank clerks be annoyed by cheque writers querying them as to how large a cheque must be to require a stamp. Under Monday's budget provisions all cheques, no matter how small, must have at least a three cent excise stamp affixed. The only exemption is in the case of cheques issued by butter and cheese factories to producers of milk and cream.

Ten Per Cent Tax On Toilet Articles

Ottawa, March 23.—Keeping sweet, clean and beautiful will cost more in Canada now. The new budget places a 10 per cent excise tax on all articles, materials and preparations, "soapservice will provide ample facilities for all present requirements.

monly or commercially known as toilet articles," for use in connection with care of the human body whether for cleaning, deodorizing, beautifying, preserving or restoring."

See Coal Possibilities Mid-West Saskatchewan

Regina, Sask., March 24.—In the hope of discovering a bituminous coal field in middle western Saskatchewan, application has been made to the Saskatchewan department of mines for a lease in the Trappin Lake area, by Barnes and Campbell, of Dundas;

This area, which is north of Kindersley, and forms a half-circle with a portion of the Alberta Saskatchewan, has already as far as the diameter has already been prospected to a certain extent by Professor F. H. Edwards, of the geology department of the University of Saskatchewan, and some samples of coal have been found.

This area has been characterized for some years by the Dominion government as being within the area showing geological possibilities for the discovery of coal.

At Ottawa

On March 21st, with every member in his place and the Galleries crowded, Mr. Rhodes delivered the annual budget address. The Press men were all present and the wires soon carried important pronouncements to all parts of Canada. The Minister pointed out that a world financial storm of unprecedented severity was still in progress and he hoped that the world economic and monetary Conference that should be held soon would solve some of the problems.

Trade is at a low ebb so revenues had fallen and the accounts showed a deficit of 165 million dollars, which amount must be added to the national debt. The unmatured bonds are as follows:

Payable in Canada, 2,013 million	
Payable in Canada and New York	91 "
Payable New York	300 "
Payable in London	310 "

Total \$2,714 "

New taxes will be imposed with the hope that the deficit next year will not be so large. The sales tax will remain at 6 per cent, but several food products now exempt will come under this Act. A special tax at 20 per cent will be levied on all sugar whether levied from the home-grown beets or whether imported as cane or as refined sugar. We, who are interested in encouraging the erection of Sugar Beet factories, had hoped that a rebate

Rev. Geo. A. Shields, Minister.

Minister.

would be given on sugar made from home-grown beets. We still hope that the Prime Minister will change this item to benefit the irrigated districts.

Except cream, sherbet, all cheques even those for less than \$5.00 must now have a stamp of 3cts. or more. The income tax is to be increased. A salary of \$30,000 will now pay \$80.00, and of \$5,000 will pay \$20.00, one of \$10,000 will pay \$450 and the man who makes one million dollars a year will pay \$3271.51. This is, of course, only the Dominion Government tax, does not refer to the Alberta Income tax. A special tax of 10 p.c. will be added to all cosmetics and toilet preparations, 5 p.c. to automobile tires and tubes whether made here or imported. Cigarette paper, matches, mints and syrup also will have a new tax.

An Agricultural Stabilization fund will be established by the Government. From it there

will be paid to exporters to the British market the difference between what is actually obtained for the pound sterling when brought back to Canada at 60.

It applies only to meat, poultry, fresh fish, canned fish, tobacco, cheese, milk products, canning fruits and vegetables, maple products, eggs and honey. This is a bonus of from 60 to 80 cts for

Catholic Church

A Scheme To Raise Prices.

The tremendous decline in prices of all primary products in Canada, in common with similar declines throughout the world, the huge accumulation of unsettled debts and other debts, the unparalleled restrictions imposed by nearly all nations upon imports from other nations; the breakdown of the gold standard and the resultant upsetting of exchange rates between countries; the stupendous number of unemployed throughout the world, and the less or plus price of power by practically everybody as a result of these economic factors and disasters, have led to making of all kinds of proposals designed to remedy either temporary or permanently, the situation in which mankind is now finding.

Many of the suggestions advanced are hopelessly impractical; some utterly fantastic; and not a few of the so-called remedies would only serve to intensify the disease rather than ameliorate or cure it. Unfortunately, the distress occasioned by the present world economic situation is so great, and the pressure of the moment is so strong, that many people are willing to accept any solution to their problems, that thousands of them are in a state of mind where they are prepared to grasp at any straw, and the more stirring the promises made in support of any given scheme, the greater the danger of being "lulled into a false sense of security" and thereby regretting the loss of time.

Included in the suggestions are: a grain embargo; a禁令; a general inflation of money. Some advocate the printing by the Government of tens of hundreds, of millions of paper money without any reserve of any value held against them. Others demand that steps be taken to bring the Canadian dollar to a parity with the British pound sterling. In scores of communities the proposal to scrap is strongly supported as a means of putting more money into circulation, bringing up business, and the payment of debts, and as a means of raising prices of primary products. Some extremists advocate the regulation of existing debt.

Despite the difficulty of their present situation, we believe the overwhelming majority of the Canadian people do not look upon regulation of debt with favor; rather than they are anxious to pay their debts and are anxious to do so only when placed in a position to do so.

They feel they can pay their debts in the future, as they did in the past, if they could only obtain a fair price for their products above the cost of production, or steady work at a fair wage.

Because we are convinced such is the attitude of the average man, we are interested in a plan of Colin H. Burnell, past president of the United Farmers of Manitoba, a recently outlined by him in the press. Mr. Burnell proposes what he calls the Collective Produce Clearing Association, and, in brief, his plan is this:

A farmer producer brings, say a can of cream to a dairy for which he receives a cash ticket for 50 cents. Instead of cashing that ticket, he takes it to the Collective Produce Clearing Association and exchanges it for a stamp. This stamp is good for 50 cents worth of any article produced or goods or services. The C.P.C.A. got the original 50 cent cash ticket from the farmer and the 50 cents paid to it for stamps, or \$1.00, consequently its account at the bank was good for \$1.00 when the Bond was finally presented.

Unfortunately, this is a form of inflation, but there was no per cent cash paid every Bond issued. The 4 cents paid by each holder of the Bond some may argue was in the nature of a sales tax. May it not be even more fairly called a 4 per cent discount? And who in these days would not willingly grant a 4 per cent discount if the volume of business could be practically doubled? As fast as these Produce Bonds were turned over fourteen times, and then cashed, one dollar of money would be placed in general circulation instead of only fifty cents had the farmer cashed his original cream checks.

As Mr. Burnell points out, farm produce would flow to market as usual without interfering with prices which are set on an export basis. It would, however, add still allow of feeding the unemployed cheaply, but many of these would be absorbed by the greater volume of business which would result.

It is not argued that the scheme is perfect, nor that it is a solution of existing difficulties. It is admitted that it may be considered somewhat cumbersome, but, so, too, is the present situation. There may be other difficulties, but Mr. Burnell's plan certainly overcomes many of the objections properly advanced against the usual issue of scrip plan.

One small weakness does detract itself, but it is a detail and does not detract from the merits. That is, the 4 cents paid for each Bond on the dollar, which is all the profit the C.P.C.A. would receive, is not sufficient to cover the costs of operation, including printing of Bonds, stamp distribution of all to sent centers, and the bonding of an agent of the C.P.C.A. in each country town which it is proposed should be done. However, if a 4-cent stamp on the turnover of a \$1.00 Bond was not sufficient for the purpose, a 5-cent stamp, or a 5 per cent discount instead of four, would do just about more than sufficient.

Mr. Burnell's plan is certainly deserving of further consideration and study by farmers, merchants, and, in fact, everybody because one and all are anxious to find some relief, even of a temporary character, from the impasse into which all have been brought and from which all are seeking a way of escape.

Abolition Of Poverty

American Investigator Has Cheery Word for the Future

W. F. Ogburn, who is Director of the Research Committee of Social Progress, a non-profit organization of the United States Government, has a cheery word for the future. He sees ahead, when the clouds have rolled away, that strides will be made towards the abolition of poverty. There is a fact, he says, which determines the standard of living—population, natural resources, technology and economic organization.

"If the population is kept small," he argues, "that will be a great help in making progress." In view of the fact the nation will plan the utilization of its oil, coal and other natural resources, eliminating the prodigious wastes of present-day organization, nature reserves will abundant land, water, energy, coal, and rising costs may be postponed.

"New inventions and new machines will be a great aid to raising the standard of living, the techniques to the contrary notwithstanding. All the country is not yet in the same place away from man's mind. Advancing technology will do far more to give us all more of the good things of life than any redistribution of wealth. The greatest difficulty to be overcome is the reluctance to be the economic organization, which has many serious weaknesses, but which is in no way in danger of collapse, unless there is another big war or a revolution."

Polarograph Is New Device

Instrument Has Been Perfected Which Analyses Any Substance

The polarograph, a new instrument for chemical analysis of substance, liquid or solid, which, by the use of an electric switch automatically, requires only four or five minutes both the kind and the amount of chemical substances present, was described at New York by the Carnegie Endowment for International Peace.

Among the many uses for the new instrument, it was explained, is an almost instantaneous analysis of the contents and quality of all alcoholic liquors which at present takes considerable time and expense. By the use of the polarograph, the analysis will at once, draw tell-tale curves on a graph which will tell exactly the kind of alcohol the liquor contains as well as the percentage.

Mongolian-Japanese Dictionary Completed

Is First of Its Kind and Contains 2,000 Pages

After 15 years of work, Major Kenji Shimogoma of the Japanese War Office has completed a Mongolian-Japanese dictionary, the first of its kind, which will be published by the army. It is a book of 2,000 pages.

The army long has given close attention to the study of foreign languages and has in its language school experts in all the major languages. Major Shimogoma has specialized Mongolian Chinese dialects, Manchu and Tibetan. He had to design special type to reproduce the intricate Mongol characters appearing in his dictionary.

OVER 12 MILLION JARS USED YEARLY

WORLD HAPPENINGS BRIEFLY TOLD

Last calendar year 50,000 pounds of New Zealand butter was shipped into Canada, while 100,000 pounds came into this country in butter.

Eighty-one persons were killed, 120 injured and 10 were missing after an explosion in two gasoline tanks in a Chinese restaurant in est Shanghai.

Four days in Ottawa during the Imperial Economic Conference, the Empire Free Producers' Federation will hold its first annual meeting in London, England, in the latter part of August or early in September.

Compulsory voting is provided for in bill which Mr. W. Sinclair, House of Commons C. W. Scott, is eight days, 20 hours, 40 minutes.

There was one automobile to every 60 people in the world in 1931, as compared with one per every 54 in 1930, according to figures compiled by the U.S. Bureau of the Department's automotive division.

Sir Charles Kingsford-Smith, it is said, is planning to fly for a new record for a flight from England to Australia in about eight days. The record held by C. W. Scott, is eight days, 20 hours, 40 minutes.

Two manufacturing firms in London, Ontario, are producing about 30,000 jigsaw puzzle daily. Some 450 people, mostly girls, have been given employment and the payroll is more than \$75,000 weekly.

A chain of meteorological stations, linked with posts in the Arctic, the tropics and Antarctic, in daily radio communication with a central bureau, is the ambition of Sir Hubert Wilkins, adventurer and scientist, he told interviewers at Winnipeg.

Adoption of speed limit regulations to be replaced by provision placing census on drivers to run their cars at a speed warranted by circumstances not to endanger the life or property was approved by the Ontario Motor League meeting in Toronto.

Greece Barters With Canada

System Sanctioned By Recognized Government Now In Effect

First official system of barter receiving sanction in modern times from a recognized government came into effect February 16, when the Republic of Greece passed an importation of a certain amount of commodities onto exchange for Hellenic products, it was learned from officials of the Montreal Board of Trade.

Products which must henceforth be exported to Greece on the barter plan include fresh oil, dried fruit, apples, and other leather products, furs, furniture, iron products including iron pipes and tubes, perfumes, toys and pencils.

The barter plan is a great interest of industrialists here, particularly in the United Kingdom and France, but what effect the Hellenic experiment will have upon Canadian export business is not known here.

A committee of five often consists of the men who does the work, three others to put him on the back, and one to bring in a minority report.

QUIVERING NERVES

Yield to Lydia E. Pinkham's Vegetable Compound

For Cadet Training

House Of Commons Passes Vote For \$300,000 For This Purpose

The House of Commons passed a vote of \$300,000 for cadet training, defeating an amendment by Miss Agnes Macphail (Peterborough-South-East Grey), decreasing it by \$100,000.

The question of cadet training in Canadian schools came up for discussion again when the national defense estimates were under consideration. When it was moved, amounting to \$300,000, it was considered it met with considerable opposition.

A motion was before the committee, moved by Miss Macphail, that the vote be decreased by \$30,000, an amount equal to the objective of the United Charities of Ottawa, for its work in the interests of needy children.

Ancient Tortoise Dead

Inmate Of London Zoo Was 26 Years Old

London's oldest resident died at the ripe age of 200. He was Sopa, a tortoise of the type which first saw the light of day in the Galapagos Islands about the time when George Washington was in the cradle.

Sopa was so big he carried children for rides on his back and so old he crept when he walked.

The tortoise still has an American alligator, 120 years old, and two tortoises well over the century mark, but Sopa was the most ancient of them all.

A RAVISHING BLACK CREPE DRESS FOR DINNER SUN- DAY NIGHTS AND EVENING WEAR

Whether you carry this model out in black wrinkly crepe silk, white wrinkly crepe or printed crepe silk, the dress is a beauty.

Note how charmingly the deep armholes are finished with applied buttons which make a perfect sequins. The belt may also be of sequins.

The lower bodice is fitted with pointed front seam to cut breadth. The slim skirt has a comfortable hemline.

It's a model too that is stunning for cruise wear and later for summer evening wear. It is a real chiflon with silver crepe black dots.

Style No. 917 is designed in sizes 14, 16, 18, 20, 22, 24, 26 and 28 inches bust.

Size 16 requires 3½ yards 20-inch with ½ yard lining contrasting.

Pattern No. 917 pattern cost 50¢ in sample or coin (coin is preferred). Wrap coin carefully.

Recipes For This Week

(By Betty Barclay)

BAKED BEAN LOAF

Baked beans (No. 2 can)
1 cup bread crumbs.

1 onion, chopped.

1 egg.

½ cup liquid—evaporated milk or liquid from a canned vegetable.

Salt, pepper, paprika.

Chop or mash the beans and add

crumbs, liquid, beaten egg and seasonings. Shape into a loaf, cover with slices of bacon and bake in a moderate oven, 350 degrees, for 30 minutes. Serve with mushroom-tomato sauce. This may be made of canned tomato soup or of canned tomatoes.

BAKED PRUNE WHIP

2 cups cooked prunes.

1 teaspoon grated lemon peel.

2 teaspoons lemon juice.

4 tablespoons powdered sugar.

4 eggs, well beaten.

Pit prunes and beat to a pulp. Add

lemon peel and 2 cups of

white of eggs until stiff, add 2

tablespoons powdered sugar and con-

tinute beating until stiff. Whip prunes by spoonfuls into egg whites.

Put mixture in a mold and bake in a moderate oven (350 degrees Fahrenheit) or 20 minutes.

A certain gentleman arrived late for dinner and was required to sit at the head of the table. He was sitting beside him while the orchestra was playing.

They have just finished the Ninth Symphony."

"I'm am I as late as that?"

By this time, father has tired of

playing with the electric train Junior

and then fled, abandoning his booty.

It is not always wise to tell all

one, but it is well to know

all one tells.

Against Nature's Laws

Fruit Without Pips Is Product Of Horticultural Experiments

"Because certain fruits do not conform to Nature's laws, humanity is able to enjoy their dessert without the trouble of pitting them," said the interesting statement of a Covent Garden importer. "Sex laws apply to plant life just as they do to the rest of Nature," he went on. "Speaking generally, no fruit can grow unless there has been some such 'marriage,' as we say, between two plants. If there were no such 'marriages,' as has taken place, the fruit withers and dies. Fruits ago certain fruits, including the banana and the breadfruit, rebelled against these laws, and for some reason unknown to us, the trees were capable of producing sexless fruit. That is the reason why there are no pips in bananas."

"Horticultural experiments in this regard were undertaken some years ago with oranges, grapefruits and persimmons. The result of these successful trials the seedless fruit was at last produced. It is now only a matter of time for growers to discover methods whereby seeds can be completely eliminated from all kinds of fruit."

Bad Habits

Accumulating Things That Tend To Make Us Poorer

A traveler riding through a bare stretch of country saw an old man cultivating a field, and stopped to talk to him. The field was dry and rocky and the crops were poor.

The old man seemed to be a nervous hard-working man, and the traveler felt sorry for him. "You seem to have rather poor soil here," he began, "do you own much of this land?"

"Yes, I've got quite a bit of it," replied the old man, "but the more a man's got of this kind of land the poorer he is. That's like some other things that folks have sometimes, isn't it?"

No doubt we all can think of things that are like this. They are bad habits, usually belong to this classification. No matter what the bad habit may be—laziness, procrastination, lack of system, hasty temper, obstinacy—we can see that these things make us poorer each day. Is it not good for us to get rid of these? We are accumulating things when we know that they make us poorer. From Great Throats.

One of Our Greatest Memorials

Felt Hat Hangs By Roadside In New South Wales

By the side of the road which winds through the mountains, the back blocks of New South Wales, hangs the strangest of memorials. It is an old fedora hat.

Time-worn and battered, and covered with mud. It has been there since the主人 who owned it, when going down the road in their carts (or never carts) point it out, and to a stranger will say that it is all that is left of poor Frank Burke.

Burke was driving a cart along the country road when for some unknown cause frightened the horse. It bolted; and horse, cart and driver went over the side. The cart was smashed to splinters far below. The horse, strangely enough, was found half-way down the bank unharmed, and was still breathing.

They found his body after a search and some man in the party took the hat which lay beside him and hung it on the branch of a tree. There it remains, and nobody touches it or even thinks of moving it.

Tourist Traffic Lower

Number Of Canadian Cars Travelling Abroad Also Less Last Year

The tourist traffic showed a falling off for 1932 compared to 1931, according to figures issued by the Department of National Revenue. Automobiles entering last year for less than 24 hours totalled 3,671,267 and the year before 3,439,492. For periods not exceeding 60 days, 1,032,081 entered last year and 1,469,763 the year before. For longer periods, however, there was an increase, those staying up to six months totalled 1,636 last year and only 1,441 the year before.

The number of Canadian automobiles touring abroad was also reduced last year, traveling 376,534 and the year before 500,562.

The figures for western provinces of last year's entry of tourist automobiles for 24 hours, 60 days and over 60 days, respectively, follow: Manitoba, 32,999; 11,993, 12; Saskatchewan, 10,896, 4,632; Alberta, 1,720, 3,894, 1; British Columbia, 49,406, 94,366, 48.

"It best for you and Baby too"

On Verge of Starvation

Eskimos At Churchill Face Report To Be Short Of Food

A poor run of white fox and deer in the Churchill Inlet country, 450 miles north of Churchill, have left the Eskimos on the verge of starvation this winter, according to the Rev. Francis Churchill, Roman Catholic missionary at Churchill, who has arrived from the north.

The missionary says that the natives will be able to get through the winter, but supplies are low. Last year the natives had to buy supplies at the hospital-mission, which were held with the motorship "Theresa." It was his intention to make several trips, but engine trouble and bad weather prevented him from making scheduled trips and he was unable to take advantage of a few tons of supplies to the post.

Before making the final dash south to Churchill, Father Duplin and a crew, including walrus meat, Walrus Island, south of the inlet, they got 18 walrus, averaging 1,000 to 1,500 pounds apiece. The old men seem to be hard-working and the travellers felt sorry for him. "You seem to have rather poor soil here," he began, "do you own much of this land?"

"Yes, I've got quite a bit of it," replied the old man, "but the more a man's got of this kind of land the poorer he is. That's like some other things that folks have sometimes, isn't it?"

No doubt we all can think of things that are like this. They are bad habits, usually belong to this classification. We are accumulating things when we know that they make us poorer. From Great Throats.

Radios In Canada

Statistics Show That There Are Sixteen Sets For Every 100 Farms In The Dominion

There are approximately 60,000 sets in Canada. British Columbia farms are the most liberally provided among the provinces of the Dominion, with Ontario second and Saskatchewan third. The number of radios per 100 farms in British Columbia is 22.92 and in Ontario 21.92. Manitoba, Saskatchewan, 10.20; Manitoba, 20; Manitoba and Alberta each have 18 radios per 100 farms, while in Nova Scotia and Prince Edward Island there are eleven, in New Brunswick eight and in Quebec six. The total number of farms in Canada is 73,160 and the number of radios on farms 116,354.

These figures are taken from a bulletin issued as a result of the 1931 Canadian census. It analyzes the returns in regard to radios in much detail, and shows an average of 74.22 radios per farm, with 60.44 sets in Canada, 49.60 in Ontario, 46.40 in Quebec, 32.44 in British Columbia, 25.24 in Nova Scotia, with 50.52 in Prince Edward Island and 35.05 in Yukon. Mining districts have 16.5 radios for each 1,000 inhabitants.

The birch tree sheds its bark annually.

WHAT when the sap begins to run in the Maple trees in southern Quebec? It is accepted as a sign that Spring has come and so the restraint of winter is thrown off and crowds of people, young and old, gather in the maple groves to taste the sap and to watch the boil down of the dead leaves while others drink the sap or dip their sugar paddles in the syrup that is being boiled down into sugar. The photograph shows a section of a gay party in a Quebec Maple Sugar grove.

Peter Veregin, Freed By Order Of Court, To Leave Canada

Halifax.—Released from deportation by court order, free from the fear of deportation to Russia, Peter Veregin talked things over with his chief lieutenants today, expressed his personal intention of leaving Canada forever, and declared the future policy of the Bolshevik colonies under his control to be "a secret between himself and God."

Saturday, Mr. Justice Humphrey Mellish declared any existent cause for deportation had been removed by the pardon which shortened his sentence for perjury from 18 months to nine.

It is understood, however, that just as there were difficulties in the way of his avoiding deportation to Russia, there are now technicalities to be overcome before he can leave Canada. Still his position as the Department of Immigration is the project under which he came to Canada from Russia five years ago, and it is said it will be necessary for him to re-enter this document before he can obtain a visa on his return.

Whether or not the department will take any further action was unknown yesterday. C. B. Smith, K.C., its legal representative, has forwarded copies of the Judge's ruling to Hon. Wesley G. Bishop, Minister of Justice, for review. Meanwhile, at Ottawa, George, commissioner of Immigration, A. J. Lalonde, declared "so far as the department is concerned Peter Veregin is a free man."

"I am staying just one month in Canada to finish up my affairs, then I am leaving," Veregin said in an interview with the Canadian Press, the first he has been permitted to give since his release from prison a month ago. "I am going to Mexico, where I am to a few terms, the spiritual leader of Canada's Doukhobor colonies spoke through an interpreter, S. P. Holden, his personal secretary.

For the first time since he entered Canada last April 10, 1933, to serve a sentence for perjury, the Doukhobor leader revealed his intended departure.

The Doukhobor monarch will not remain in Canada, he said. He plans to go to Mexico, Costa Rica, Argentina and Uruguay. He was going, he said, to "look for land," but he would not say in which of these countries, if any, he proposed to locate. Nor would he state whether he would take his 16,000 followers with him. This information he held as a "secret between himself and God."

Scouts Honor Head
Ottawa, Ont.—The Dominion's 62,000 Boy Scouts and 30,000 Girl Guides on Feb. 22, 1933, celebrated the unique world chain of banquets, which annually celebrate the joint birthday of Lord and Lady Baden-Powell, respective heads of both organizations throughout the world.

Cool Bonus Continued
Ottawa, Ont.—Federal assistance in the movement of Canadian coal will be continued at least until the end of the fiscal year of 1933-34, Hon. W. A. Gordon, Minister of Mines, told the Senate. The extra bonus is not \$200,000 greater than last year because of the extra movements of coal under the subventions agreement.

Italy's exports of cotton products are increasing.

Measure To Lower Rates On Grain Moving Westward Is Defeated

Ottawa, Ont.—The House of Commons turned down a bill designed to lower freight rates on grain moving westward from the prairies. By a vote of 97 to 56 seven bills were turned down after Hon. R. J. Manton, Minister of Railways, said the four western provinces had agreed to a proposal to reduce by 50 per cent. the speed limit on export and domestic rates of grain prices.

The measure was sponsored by Thomas Reid (Lib., New Westminster), who claimed discrimination was being shown against British Columbia in grain rates.

The four western provinces, said the railway minister, had agreed to a proposal, first discussed at the Do-

A Strange Paradox

Banks Of France Glutted With Gold While Struggling With Depression

Paris, France.—France presents the world's great paradox. Her banks and her country are glutted with gold and yet she is struggling to make both ends meet.

The senate has voted one month's importation of gold. It has approved the 9 per cent cut in civil servants salaries and the 10 per cent cut in pensions. It has reduced parliamentary indemnities by 10 per cent. But the senate is pronounced on the principle of not reducing the budget.

For a time there was the financial peace from the Upper House. But throughout the country uneasiness grows. On the billboards are monarchist manifestations from Du Guise—France's claimant king in exile. The workers appeal for a front united.

The newspapers ring with a student cry for more economy. On the heels of a strange strike, shopkeepers in the provincial towns are closing in protest against higher taxes.

The taxpayers' federation has appealed to the consumers to line up with the shopkeepers and protest the "cost of living" yet not increase their incomes and salaries are falling.

Chambers of commerce up and down the country are resolving for economy and for equality in taxation.

Again there is the struggle over what is the discount rate over what is considered a growing menace to peace across the Rhine.

The government is reported to have a wide army reorganization scheme in the making, the details of concrete and steel with which France protects her eastern frontier.

Divisions are now scattered through the country, but these will be massed near the frontier.

Assessment Is Cut

Vancouver Cut \$350,000 from Taxation On CN Property

Vancouver, B.C.—Civic assessment on the uncompleted Canadian National hotel was dropped \$500,000 to \$2,000,000 by the city council sitting at noon yesterday.

Valuation on the Canadian National Steamships dock at the foot of Main Street was reduced at the same time from \$800,000 to \$750,000.

In all, the city of Vancouver reduced taxation this year on \$350,000 worth of improvements owned by the Canadian National Railways.

Payments To Railways

Ottawa, Ont.—Payments made by the federal government to the railways consequent on the Maritime Freight Rates Act of 1927 amounted, up to the end of the last fiscal year, to \$37,563,938, according to a table in a speech by Hon. T. H. Belisha, Minister of Commerce. On the total sum of \$32,071,383 was paid to the Canadian National Railways, and \$3,592,565 to other lines.

Ans For Correspondence

Ottawa, Ont.—George Cook, United Farmer member for Macdonald, seeks all correspondence passed between the province of Alberta and the Dominion Government relating to the failure of the City of Calgary to pay New York premiums on a bond issue at the new year.

He was the author of several of the authoritative legal text books and of many essays, articles and pamphlets on constitutional, political and historical subjects.

Co-Operation Essential

Great Britain Cannot Act Alone On Arms Embargo

London, Eng.—The cabinet decided Great Britain must act independently in its efforts to impose an embargo on the far east. Co-operation by other arms exporting countries is essential for any practical scheme, the ministers held.

France, Italy, and Great Britain are likely to be the main participants in the simple process of refusing licenses for the export of arms, but the official view here is that the procedure in some other arms producing countries is not so simple.

Bill Was Defeated

Move To Give Vote To Quebec Women Again Beaten

Quebec, Que.—A bill to give women of this province the right to vote in elections was defeated in the Quebec legislative assembly. Defeat came by way of a six months' hold.

Party lines were forgotten and even the calls of Prime Minister A. Taschereau were not heard when vote was called on this personal bill.

Miss Isola Saint Jean, president of the Canadian Alliance for Women, said she thought the measure should first have been presented in the legislature.

"The expected thing happened," said Mrs. John Scott, another feminist, "but the cause is going onward and upward. We haven't had to go through what women in United States had to. We haven't been rotten-egged to lines."

A NEW WORLD'S RECORD

The "Bluebird II," which covered the course at Daytona Beach in a new

world's record. Sir Malcolm Campbell, British Speedster, set up a new mark of 272 miles per hour. Extensive alterations were made to the "Bluebird" to

greatly increase its power.

FINANCE MINISTER ILL

Hon. E. N. Rhodes, Canadian Minister of Finance, who took up his duties at Ottawa ten days ago against the advice of his medical advisers, has been again forced to relinquish his duties owing to ill-health. This means that the Prime Minister may have to prepare the 1933-34 budget.

British Trade Improves

Not Only Recovering, But Shaping a New Britain

London, Eng.—The United Kingdom's trade with foreign countries during 1932 was better than ever before, and its exports to empire countries also increased in the same period.

Commenting on these trade statistics, Miss Leslie Belisha, former minister of agriculture, said in a London speech: "we are not only recovering but are shaping Britain anew."

A general improvement in trade statistics was evident in 1932 over 1931, and the adverse trade balance for the same period was reduced from £408,000,000 to £289,000,000, noted Dr. Archibald.

Affectionate figures which testified to increased trade in several departments, Mr. Belisha proclaimed the trend "one of the most miraculous rehabilitations ever recorded in history." The United Kingdom had the same visible receipts as we had in 1931 we should actually be £100,000,000 on the right side," he continued. "We imported less food and more raw material and exported more manufactured goods in 1932 than in 1931."

Aviation Problems

Subject For Debate Before Interested Audience In London

Four days after the 67th anniversary of its foundation the Royal Aeronautical Society, which is the oldest organization devoted to aerial matters in the world, held their annual meeting in London. A crowded audience in a London lecture hall listened for two hours to some of the leading men in British aviation as they spoke on various aspects of official control of flying, centred around the question before the assembly that "civil aviation differs from military aviation and should be treated accordingly."

C. R. Fairley, president of the society, excused the innovation on the ground that the members were leaders of vital import to the future of British flying. General J. E. B. Seely, new chairman of the Air League, answered emphatically those who believed the air weapon was of secondary value in the war-crusade. His cited the terrible effects of blockade as practised against the central powers in the last great war as part of his proof that the air arm, properly employed, was more humane than some other means of forcing a country to sue for peace.

Members of the House of Commons, notably Capt. H. H. Balfeur, deplored the ignorance of aviation that marked the "mother of parliaments" as the present day and the general public, as typified by the majority of politicians in one of the most significant happenings of the 20th century. Handley Page, pioneer aircraft constructor and airline operator, had much to say about the present situation of Europe and the present trend of air transport subsidies. He urged the pseudo-military systems, masquerading under the guise of commercial ventures, in some European states could only be countered by drastic revision of subsidies.

He showed that 34 countries in Europe expended more than \$4,000,000 annually in direct subsidy to air transport, while in America the total, Holland—shared with Great Britain the possession of air lines which are approaching real commercial and economic operation.

Mr. Handley Page made the assumption that the cost of flying on the commercial airlines in a year weighed approximately 15,000 tons (at 12 tons to a ton) and on this basis he arrived at the astonishing conclusion that the carriage of every air mail passenger costs about 10 cents a mile.

The green must be of the chlorophyll hue, scientifically described as the portion of the spectrum lying between 4,900 and 5,600 angstrom units.

Appropriately \$14,000,000 worth of green apolis annually in the United States the department finds, and believes inauguration of the color protection will go a long way in saving foods. Coe reported that food exposed in clear glass containers spoils most rapidly than yellowish or bluish green failed to protect.

The green must be of the chlorophyll hue, scientifically described as

the portion of the spectrum lying between 4,900 and 5,600 angstrom units.

It is continuing experimentation to ascertain if other colors will guard the sweetens and purity of non-oil bearing foods.

The green protective principle applies to butter, sausages, lard, bacon, ham, whole wheat flour, granola, many bakery products and foods containing some quantity of oil.

Sunlight hastens the photo-chemical decomposition of silk. Experiments have shown, Coe said, that ultra-violet and infra red rays cause quick decomposition of certain foods.

Color Protection For Foods

Green Is Most Useful With Black As Second Best

The department of agriculture has publicly patented the discovery that oil-bearing foods are best protected from the sun's rays by green glass. The findings of Mayne B. Coe, a young chemist, who ascertained that green is the most desirable for food protection from rancidity, and black is a second best.

Appropriately \$14,000,000 worth of green apolis annually in the United States the department finds, and believes inauguration of the color protection will go a long way in saving foods. Coe reported that food exposed in clear glass containers spoils most rapidly than yellowish or bluish green failed to protect.

position of certain foods.

Ex-Kaiser Has Marcol

Sachsen Once Belonged To King William Of Prussia

The ex-Kaiser, it is said, is the man whom it was given by a little girl to King William of Prussia on the eve of the battle of Sedan in 1870. It is a sachet containing what once was a sprig of four-leaved clover.

After the defeat of the French at Sedan, the ex-Kaiser was captured,

with the wish that it would bring him as much luck as it had brought him; but years after the ex-Kaiser bought it back and during the war carried it everywhere, it is said.

Shorten Length Of River

Engineers Have Cut Ten Miles Off The Mississippi

Ten miles was clipped off the length of the Mississippi River when engineers, using dynamite, tons of dynamite, labored a long time to bankbank at Diamond Point, south of Natchez, and allowed the river to flow into a new channel. It took two dredges working in opposite directions nearly three months to cut the channel through the point and the dynamite did the rest.

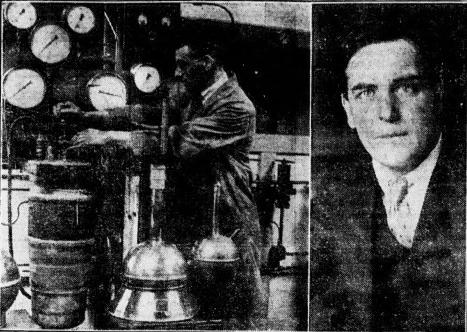

An organization of nature-lovers is asking Congress to pick a national tree. Without wishing to prejudice the thing, it says, "we think that the plane would be the most suitable to the chosen representatives of the people."

"Mother—'What made you stay so long? Have a flat tire?' Daughter (dreamily)—'No, mother, I'd hardly call him flat.'

No living species of birds have teeth.

An airplane of 100 horse-power costs between \$2,500 and \$1,000.

BALDWIN OPENS A WONDER LABORATORY AT CAMBRIDGE

A wonder laboratory for research work was opened by the Right Hon. Stanley Baldwin at Cambridge this month which contains apparatus which will split the atom on a scale unknown before. The building is the new Ludwig Laboratory, where the Russian scientist, Professor Kapitz (right), will carry on his atomic research. The photo on the left shows part of the laboratory in which can be seen a hydrogen liquefier for making liquid temperature minus 233 centigrade.

Ancient Egyptian Brewers

Papyri Shows Life As It Was 2,000 Years Ago

Even as United States legislators of the Senate and those of Canada are too busy drafting bills, governments had their problems in organizing the beer business back in 254 B.C.

From ancient Papyri, some of them filled with worm holes, research workers at Columbia University are even getting a picture of life as it was 2,000 years ago.

One group of the documents shows that in ancient Egypt brewing was under government regulation. The state furnished a given amount of barley each year and received a certain amount of beer in return.

This opinion was arrived at in the light of data contained in a report submitted to the committee. This report shows that there are some 50 to 60 million persons in the world directly or indirectly affected by unemployment.

The report shows that a large number of unemployed in more than one country—not the mean to obtain the minimum of food necessary to sustain life to the nation experiencing trouble in boats, clothes and meat.

But indirectly, the insufficiency of food, through weakening of the body, allows disease and particularly tuberculosis, to gain hold more easily, and the psychological effects of prolonged unemployment may be hard to measure.

A further problem arises from the exodus of the unemployed from towns and settlement in slums where sanitation is often defective.

Health Of Jobless Impaired

Millions Unable To Get Enough Food Opinion Of League Committee

In the given opinion of the health committee of the League of Nations, the world crisis has now become so acute as to have serious effects on public health.

This opinion was arrived at in the light of data contained in a report submitted to the committee. This report shows that there are some 50 to 60 million persons in the world directly or indirectly affected by unemployment.

The report shows that a large number of unemployed in more than one country—not the mean to obtain the minimum of food necessary to sustain life to the nation experiencing trouble in boats, clothes and meat.

But indirectly, the insufficiency of food, through weakening of the body, allows disease and particularly tuberculosis, to gain hold more easily, and the psychological effects of prolonged unemployment may be hard to measure.

A further problem arises from the exodus of the unemployed from towns and settlement in slums where sanitation is often defective.

Has Private Privilege

English Lord Can Use Library Reserved For Royal Servants

A peculiar privilege belongs to Lord Inchiquin, who celebrated his thirty-sixth anniversary a few days ago. He is the only man in the United Kingdom to whom his services in Ireland have been granted such as were by attendant upon the King. This unique privilege was granted to the family by Henry VIII, as compensation to the O'Briens when Lord Inchiquin was titular chief—for relinquishing a claim to the sovereignty of Southern Ireland. The O'Briens were Kings of Munster for centuries.

Young Writer.—The art in telling a story consists of knowing what to leave out, and what to leave in.

Friend.—It doesn't make much difference, my boy. My experience is that she finds out anyway.

Bulletin (Sydney).

No artist can paint a self-made man as big as he thinks he is.

Trapper Reports Furs Scarce

Catch In Fort Reliance Area Mostly White Fox

Contrary to most reports this year from the Northwest Territories in as far as the fur market is not plentiful, according to A. E. McFarland, a trapper who was forced to return to civilization by illness. He arrived in Edmonton on the N.A.R. train from McMurray after an arduous trip, taking his furbearer with Canadian Airways' pilot.

McFarland, who has been trapping in the north for the last seven years, reported the mildest winter in the Fort Reliance area since he has been there. Winds have been exceptionally strong, however. The catch has been mostly fox, with a few marten and, possibly a pumice or two put away for winter use.

Last October he saw huge caribou herds ranging in number from 10,000 to 40,000.

"People down here would never believe how large these herds are," he said. "I got within half a mile of them and it was a sight worth a lot of money to a film producer." He explained.

McFarland was taken ill and was brought down into Fort Reliance by a neighbour who, with his team, drove 120 miles east of the fort on the headwaters of the Thelon River.

He came down with the R.C.M.P. Patrol to Fort Resolution and on to McMurray by airplane.

Use of Narcotics

Alberta May Take Matter Up With Federal House To Check Evil

On check the illegal use of narcotics in Alberta will be taken up with the Federal authorities, according to statements made in the legislature by Hon. George Headley, Minister of Agriculture.

At the time, the minister was investigating the reports of the reported prevalence of doping or druging of race horses in Alberta, about which continuous stories from the press last year, Col. F. C. Jamison, Conservative, Edmonton, and J. Bowin, Liberal, Calgary.

Referring to the question, Hon. Mr. Headley said it was one of supreme importance arising from the visitation of the dangerous dope drugs to be fall into the hands of people who used indiscriminately. It was a matter which would be taken up with the authorities in Ottawa he declared.

To meet the problem of the growing population and resultant congested conditions in the cities, the government proposes to make use of one of the agricultural schools, it was stated by the minister.

More room is required for 100 choice female cases in mental institutions and it is these which it proposed to place in one of the agricultural schools.

Capital expenditures were taken in these times, the school would serve as a stop gap and it was hoped that the House would approve the scheme, he said.

Moslem Pilgrims Use Cars

Machines Have Replaced Camel Caravans To Large Degree

The camel has at last been affected by the progress of civilization.

Moslem pilgrims who cross the Arabian Desert to the holy city of Mecca, near the famed Red Sea, now use the automobile to a large degree instead of the camel, according to the commerce department.

Camel caravans were formerly employed to transport the pious overland from Egypt, Syria, Iraq and other parts of the Moslem world to the place of pilgrimage.

Hard-surfaced roads have replaced caravan routes.

Had His Sympathy

Years ago, a young lawyer, M. H. Ayleworth, now president of the National Broadcasting Co., was defending a western farmer against some bandits who had broken into his home and damaged his property, and fought Ayerworth's client, whom they were trying to force to leave. The farmer lost, and when informed he would have to give up his farm, burst into tears.

"Don't cry, please," one of the bandits said sympathetically, patting the farmer's shoulder. "Everything will come out all right."

"I'm not crying for myself," the farmer sobbed. "I'm crying when I think of your bankers going into the farming business."

It has just been discovered that in 1816 London had a baby clinic where mothers could take their children and receive advice.

Garden Notes

Developing the Vegetable Garden At Fort Reliance

(By Gordon Bradley Smith)

In the Old Country a vegetable calendar, like the one hung on the wall, includes every month in the year. In other words, the man across the Atlantic expects a continuous supply of fresh vegetables each month. How different is this compared with an average man in this country who can have new potatoes ready by early July, and corn and tomatoes by the middle of August. There is nothing to expect before the end of June, or even September, and in winter, besides enjoying our own cabbage, carrots, potatoes, turnips and similar hardy things from the cellar, we may have fresh rhubarb and rhubarb growing in the same place.

If we possess a hot bed or of a greenhouse we may have lettuce, cress and radish ready for the table. In Asparagus, rhubarb, perennial onions and parsnips come along the first week in the spring, and these are followed by beetroot, spinach and similar things which are ready for use from three to six weeks after planting. Fifty days after sowing, the earliest peas are ready and by using an early, medium and late pea, or two or three varieties, we can continue raising them for weeks. The first thinning of beets makes excellent greens and are taken out six weeks after sowing. Baby carrots are delicious and are ready about the same time. By making several sowings and using different types we can supply the market with fresh vegetables over the entire growing season. Late white corn will remain in perfect condition for several weeks after frost if we cut stalks and store, and store, and tomatoes can contain a ripe fruit for months. Lettuce and radish are hung up in the cellar. By handling the well-known vegetables in this fashion, and by gradually extending our list of new things until we have tried everything offered in the seed catalogue, we can develop our vegetable garden to its full possibilities.

General Layouts—Though we experience our ingenuity or architectural skill and our power needs to be utilized in the planning of gardens, there is about it a half complete something that is needed to soft the harsh lines and to the whole affair down to Mother Earth. To do this the gardener uses a variety of material, grass, flowers, beds, vines, shrubbery and trees. These are not the same in all cases, but the effects are individual. If the property is a wild area we will use permanent things in the way of creepers and shrubbery, but if we are in a tame area we will depend upon annuals entirely and make a fairly good job of it, because under this heading we have vines which will grow from ten to fifteen feet in a single season and tall flowers, such as Mexican Sunflower and Castor Beans, that will serve excellently in place of perennial shrubs. Even in the case of a property owner, it is a good thing to work in plenty of annuals during the first few years, while the other plants are getting established.

Avoid formality because only the most expert handle straight lines with any chance of success, and often makes a mess of it. Irregularly shaped walls borders, with clusters of evergreen trees, will be the small start generally in front, is the simplest and most effective way of handling the flowers. Against the house one can use any of the clinging vines, while semi-clinging things like the Rambling Rose, Dutchman's Pipe and narrow California Cedars close to the walls are effective.

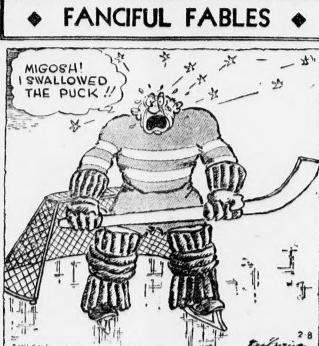

Majistrate—The traffic policeman says you got sarcastic with him?

Mr. Nagger—"But I didn't intend to be sarcastic with him, I just wanted to talk to him and I forgot myself and answered, 'Yes, my dear!'

Radio fans of Germany are demanding more political news from foreign countries and more non-partisan local political reviews.

Economic farmers in Argentina are rebuilding old stationary threshers for use this season.

FANCIFUL FABLES

Physicians Take To Air

Oklahoma Doctor Looks After Patients In Five States

Mangum, Oklahoma, boasts of a physician who has a medical practice in five states. Dr. G. Foster Border, virtually blind, has taken his practice "up in the air," and estimates he travels approximately 50,000 miles by airplane yearly caring for his patients.

Border, in his "airplane," a four-passenger airplane, administrators patients in five states—Oklahoma, Texas, Arkansas, Kansas and Louisiana.

A Perfect Landlord

New York Man Cancelling Tenants

Michael Spyroski is the perfect landlord. He returned a cheque to the Poor and Alms Department of New York, which was to pay him for back rent from tenants who have become chronic non-payers.

Spyroski returned the cheque, saying that as all his tenants were honest and had been living in his house long enough to own it, he would carry them along until times get better.

During a carnival in the Southern States a Senator rode a jackass up the steps of the state capital. Arithmetical calculation assures us that one and one make two.

Rhode Island bent, creeping bent, and Canadian bluegrass are the best grasses to plant in shady places.

R. S. Sutor A. Hankin
Proprietors

Thursday, Mar. 30th, 1933

The local C.P.R. roundhouse staff has been reduced to sum-
mer-time strength.

The Ladies of the Congregation of the United Church will meet at the home of Mrs. F. Sandeck, on Thursday, April 6th, at 3 o'clock.

Mrs. Pauline Arden, of Jen-
ner, is a visitor at the home
of Miss Beatrice Brodie this
week.

Weather of the past week has been very spring-like and farmers are now getting ready for the season's work.

The McNeills and T. Howes farms were sold this week by D. Luin to Mr. Gottfried of For Valley.

The regular monthly meeting of the Empress Chapter of the L.O.D.E. will be held at the home of Mrs. J. Campbell, on Tuesday afternoon, April 4th, at 3 p.m.

The ferry men commenced on Monday of this week to get the snow in readiness, at the south ferry crossing for the season's operations.

Mrs. D. Robertson and her two sons arrived back from Eng-
land on Wednesday. Mrs. Rob-
ertson reports that conditions there seem to be on the up-
grade.

The Married Peoples' Club social evening held in the theatre on Thursday evening last, drew a large attendance. Dancing was continued on until near 10 p.m., all present having had a thoroughly enjoyable time.

The annual Easter Tea, home cooking, sewing and flower sale of St. Mary's W.A. will be held Sat., April 15, in the Municipal Hall. Order your flowers from Mrs. N. P. Storey.

Introduces Bill To Raise Gasoline Tax

Edmonton, March 25.—In-
creasing the gasoline tax in this province from five to six cents a gallon, a bill to amend the Fuel Oil Tax act was introduced into the legislature Friday, by Premier Brownlie. The measure was given first reading. While it has been estimated that an increase of one cent per gallon would mean \$30,000 more in provincial revenue during a year, that is practically offset this year by the straight

Cleanliness

There is a story of a child who was sent home from school because of the offensive smells arising from his unclean body and dirty clothing. He returned to school with a note from the teacher from his mother, which read, "Joe ain't no rose; learn him, don't smell him."

Whether or not this story is true makes no particular difference.

The point is that the ad-

ult or child who is not clean is an unpleasant person to have around because he offends the sense of smell.

We should keep our bodies clean and change our under-clothing and stockings regularly so that we may not be offensive to other people. A warm bath once a week is usually sufficient to keep the skin of the body clean. The person who perspires freely or whose work is dusty or dirty needs to bathe more frequently.

Underclothes require to be changed frequently as they absorb the perspiration and become offensive. Stockings should be changed daily and the feet washed each day as smelly feet are particularly disagreeable.

A clean skin is desirable from a health standpoint. A clean skin does its work better than does a dirty skin. Of particular importance is the care of the hands. Because hands become soiled, it is necessary that they be thoroughly washed before each meal in order to prevent disease.

When making the announcement some days ago of the cut in motor license fees, the government stated that the cut would mean a revenue loss of \$180,000 this year. Despite the reduction, however, it may still be 140,000 ahead on account of the increased gasoline tax.

While crossing the road an Aberdonian was run over by a brewery truck. On looking up he said, "For the first time the drinks are on me."

Accredited Herd Certificate

This is to Certify that the herd of Holstein cattle, owned by Mr. Leach, of St. John's, at Empress, in the province of Alberta, has successfully passed all the required tests, applied by Veterinary Inspectors of this Department, for entry as a CANADIAN TUBERCULOSIS FREE ACCREDITED HERD.

This Certificate is valid for a period of One Year from the last date shown below.

Oct. 30, 1932; Oct. 14, 1933.

Director General,

Orlan Hall, Counter-signed

Thanking you for a share of

your patronage—Milton Leach.

vent them from depositing the germs of disease on food and enabling these germs to enter the mouth.

Personal appearance is improved when the skin is clean, the nails well cared for and clean, the hair clean and neat, and the clothing clean. We feel better when we are clean. Cleanliness raises our self-confidence, and causes us to enter into our work or play with greater zest.

Carelessness about personal appearance usually lowers self-respect. That is why when we have some important social or business engagement, we "clean up." The child is affected just as the adult. The child who is sent to school dirty and untidy is not being given a fair chance.

Cleanliness is a worth while habit. It makes life more pleasant and, at the same time, more safe, because certain forms of cleanliness, such as washing the hands before eating, are practicable measures in the prevention of communicable diseases.

Sugar Tax Represents
\$2 A Person per Annum

Ottawa, March 22.—Figuring on a population of 10,000,000, the new sugar tax of two cents a pound, announced in the budget, will, it is expected, bring in, for every man, woman and child in Canada, two dollars a year.

Statistics show the per capita

consumption of sugar in Canada is 100 pounds per annum. Of this 95 per cent. is imported in the raw and manufactured here. The remaining 10 per cent. is produced from beets in the Dominion.

The new excise tax applies both to the imported and home grown varieties.

Revenue which the govern-
ment will derive from this
special tax will approximate
\$20,000,000 per annum.
